- Volunteer Services
In 1966, a group of concerned Madera leaders formed a coalition directed at developing the healthcare facilities available in Madera County. At that time, the community was facing a severe healthcare crisis: the two existing hospitals had lost their compliance status, making them ineligible to receive government funding.

Through their dedication and innovation, the coalition was able to build a brand new facility. Completed in 1971, Madera Community Hospital (MCH) has continued to grow from an 88-bed to a 106-bed adult acute care facility, offering a wide range of sophisticated diagnostic and treatment services.

Our nonprofit 106-bed hospital is accredited through our state license and is federally certified. Our Home Health Agency is recognized as one of the top agencies in the nation, and our Women’s Care Services is recognized for its excellence.

For over 40 years, we have met the needs of our patients and community with compassion and quality care. We are staffed with hundreds of experienced team members who are dedicated to providing exceptional skill with extraordinary care.

As the community has continued to grow, so have we. Here is a look back at some of the hospital’s most notable moments:

- **1966** Madera leaders form coalition
- **1971** New Hospital open 88-bed acute care facility
- **1976** MCH become non-profit hospital governed by local Board of Trustees
- **1985** The Home Health Agency established
- **1993** Family Health Services Clinic established
- **1993** The Outpatient Center opens in front of the Hospital offering Radiology, Lab drawing, and Physical Therapy services
- **1995** New Ambulatory Surgical Center opens
- **2000** Grand opening of the 16-room Emergency Room and 10-bed Intensive Care Unit.
- **2006** Refurbishment and upgrades to the existing facility begin
- **2007** Upgrade and installation of CT Scanner
- **2008** Opening of the Chowchilla Rural Health Clinic
- **2010** Upgrade and installation of Magnetic Resonance Imaging (MRI) and Digital Mammography
- **2011** Completion of the Hospital’s Energy Facility
- **2012** Completion of new Central Power Plant
From Family Practice, Internal Medicine, and Home Health Care to General Surgery and Orthopedic Surgery, Madera Community Hospital delivers the services you need right here close to home.

Madera Community Hospital is comprised of a talented group of multi-specialty healthcare providers and a skilled team of nurses. All of our physicians are Board Certified or Board Eligible. Each member of the care team strives to meet his or her patient’s medical needs while remaining compassionate and sensitive to the patient’s emotional needs as well.

Our Family Health Services Clinic and Family Practice physicians can be considered your Care Coordinator—a physician or nurse practitioner who addresses all of your medical needs. Family practice physicians and nurse practitioners can manage the majority of conditions that their patients suffer from and can refer patients to specialists when needed. Services provided by a family practice physician or nurse practitioner include:

- immunizations
- management of chronic diseases, such as high blood pressure and asthma
- routine physical examinations
- treatment of colds and flu
- urgent care, such as treatment of cuts and sprains
- well-child care
- women’s health care, such as annual pap exams and family planning services

Internal Medicine

While a family practice physician focuses on every aspect of patient care, an internal medicine physician focuses closely on the treatment and prevention of disease. As a specialist in disease processes, an internist is often faced with complex or difficult cases. While the disease process is the internist’s main concern, he or she must be familiar with other facets of care to ensure that each patient’s needs are met. Internal medicine specialists treat adult patients.

General Surgery

General surgeons provide a wide variety of surgical treatment options. They operate on the abdomen, breast, head, neck, limbs, and skin, as well as the endocrine and vascular systems. Specific services delivered by Madera Community Hospital’s surgery department for adult patients include:

- gastrointestinal endoscopy and colonoscopy
- hemorrhoid repair
- hernia repair
- intestinal surgery
- colon resection
- minor skin and soft tissue surgeries
- therapeutic and diagnostic laparoscopic surgeries
Dedicated To Serving Patients And Families In Their Homes

Madera Community Hospital’s Home Health Agency provides a full range of coordinated and multidisciplinary health care to the patient and family in their home.

Home Health care is a cost effective, successful means of providing high quality health care services. The need for service is determined by the patient’s physician, in consultation with the nurse or therapist, patient, and family.

Our agency:

- provides care to adult and geriatric patients
- provides nursing, therapy services, and social work
- is available 24 hours per day

Our Home Health Agency Staff:

- is trained in the management of all types of ostomies and drains, wounds, IV medications, PICC lines, and ports
- is proficient in teaching medication management, disease processes, and health conditions including diabetes, cardiac and respiratory disease
- can provide treatment for falls, weakness, shortness of breath, and cognitive deficits as well as therapy following joint replacement surgery, fracture, or stroke

Madera Community Hospital Home Health Agency is licensed by the State of California. We are an approved Medicare/Medi-Cal provider, and also accept most forms of private insurance and self pay patients.

Madera Community Hospital Home Health Agency received an Award of Excellence and is named a ‘Top Agency’ by HomeCare Elite™, in a ranking of all home health agencies in the United States. To earn this award, Madera Community Hospital demonstrated a commitment to providing cost-effective patient-centered care that results in high quality patient outcomes.

If you have any questions, please give us a call at (559) 675-2000 or (800) 870-6647.
The Diagnostic Imaging Department at MCH provides imaging services to both inpatients and outpatients in a comfortable environment. Our team of skilled physicians and technologists use advanced equipment to create an efficient personal experience for patients. We are proud to be able to bring this level of technologically advanced equipment to the Madera community, providing our patients state-of-the-art diagnostics for early detection of medical problems.

The hospital is also equipped with a Picture Archival and Communication System (PACS), which allows digital images to be captured and securely stored on a hospital-wide network. Our board-certified physicians, radiologists, and licensed technologists have quicker, easier, and more centralized access to detailed images and radiology reports. Whether you’re receiving a CT scan, an ultrasound, or an X-ray, our hospital staff is able to provide you with faster and better care. Our services include:

- MRI (Magnetic Resonance Imaging)
- Computerized Tomography (CT Scan)
- Mammography
- Ultrasound
- Nuclear Medicine
- X-ray

Our Diagnostic Imaging Department appreciates the value of people’s time, so our technologists and physicians work closely with each patient to make their visit as comfortable as possible. Our services are offered Monday–Friday in both our MCH Outpatient Center and within the main hospital, where radiology services are offered on Saturday as well. To schedule an appointment, please call (559) 675-2779.

A Dedicated Team

To better meet the needs of community members, Madera Community Hospital partnered with California Medical Imaging Associates (CMIA) of the Central Valley. The CMIA Radiologists live and work in the Central Valley, and their commitment to quality care reflects that. Whether the patient’s needs require neuroradiology, interventional, nuclear medicine, or other modalities, our radiologists have the knowledge to address specific clinician needs.

California Medical Imaging Associates is a subspecialty radiology medical group dedicated to providing the highest level of service and diagnostic accuracy. Their network of board-certified radiologists shares a common philosophy of providing unsurpassed service to referring physicians and their patients.
Your After-the-Operation Destination

If you are scheduled for surgery at Madera Community Hospital, you might wonder what happens after the procedure. The likely answer: a stay on our medical/surgical unit.

Our 60-bed Medical/Surgical Unit provides adolescent and adult patients expert care as they recover from surgery in categories ranging from orthopedics to gynecology.

Around-the-Clock Care

The Medical/Surgical Unit is located on the hospital’s second floor and consists of private and semi-private rooms. The unit’s multi-disciplinary team—Physicians, Registered Nurses, Licensed Vocational Nurses, Nursing Assistants, and Unit Secretaries—works to achieve its philosophy of care, which is rooted in patient safety, teamwork, and utilizing the expertise of other providers to ensure that patients experience the best possible outcomes. Other individuals involved in care on the unit include Hospitalists, Physical Therapists, Respiratory Therapists, Dietitians, and Case Managers.

“On the Medical/Surgical Unit, our values include caring, integrity, teamwork, and excellence—all of which our staff exhibits every day,” says Meri Combs, FNP, PA-C, Director of the Medical/Surgical and Intensive Care Units.

Hospitalists

Madera Community Hospital’s inpatient department is staffed and managed by CEP America hospitalist physicians. A hospitalist is an experienced physician who only cares for hospitalized patients; and in some cases, they work closely with a patient’s primary care physician on discharge instructions and follow-up care. CEP America’s hospitalists are board-certified physicians who are dedicated to managing your care 24/7 during your stay at Madera Community Hospital.

The Medical/Surgical Unit at Madera Community Hospital isn’t just a place where patients go to heal after illness or medical procedures. The unit also serves as a learning site for the healthcare providers of the future, as student RN’s and LVN’s from nearby colleges (listed below) rotate through the unit as part of their clinical training.

- Clovis Adult School
- Fresno Adult School
- Fresno City College
- Fresno State University
- Madera Center
- National University
- San Joaquin Valley College
- West Med
Teamwork is absolutely crucial to the work performed in any ICU,” explains Meri Combs, FNP, PA-C, Director of the Medical/Surgical and Intensive Care Units. “Combining the services of Physicians, Registered Nurses, and other specialists, our unit meets the needs of each patient in a collaborative effort to provide safe quality care to our patients.”

Comprehensive Care

Comprehensive Care

Courtesy of the opening of the new ICU in 2000, Madera Community Hospital has a 10-bed ICU. ICU patients require close monitoring and observation, but as the patient improves, the level of care required is lowered. Patients are then transferred to the TCU (Stepdown) level or to the Medical/Surgical Unit, where their care continues. The ICU physicians and staff work closely with TCU and Medical/Surgical staff to assure that complicated patients are continuing to improve their medical condition, as well as providing continuity of care.

Because these units manage a broad range of patients and conditions, the one-on-one approach offered by the ICU is imperative for promoting total healing.

“We strive to work with patients on an individual level,” adds Combs. “We know the complete medical histories of our patients. It is this level of personal knowledge that helps us provide vital care for this unique population of patients.”

To learn more about the ICU at MCH, visit maderahospital.org.

An Inside Look at the ICU

An Inside Look at the ICU

W

When a patient’s health is at serious risk, a prolonged stay in the hospital may be required for the proper healing and recovery. You’re in great hands when you enter our Intensive Care Unit (ICU).

At Madera Community Hospital, the ICU provides specialized medical care and services for patients experiencing a serious illness or medical condition. Dedicated to offering care in a family-focused environment, the ICU specializes in team-based care that puts patients first.

“Teamwork is absolutely crucial to the work performed in any ICU,” explains Meri Combs, FNP, PA-C, Director of the Medical/Surgical and Intensive Care Units. “Combining the services of Physicians, Registered Nurses, and other specialists, our unit meets the needs of each patient in a collaborative effort to provide safe quality care to our patients.”

You cut your finger while preparing dinner. Your husband experiences chest pain while mowing the lawn. Whether you have a medical emergency or require urgent care, Madera Community Hospital is here around the clock for you and your family.

Since 1971, MCH has been meeting the emergency needs of Madera and surrounding communities. Recently MCH increased the size of the Emergency Department (ED), creating an Alternative Care Area to provide safe, efficient care for our patients who present with minor injuries.

“We have a robust history of helping our community when they need it most,” says Rochelle Tarascou, RN, BS-PH, MICN, Emergency Services Director at MCH. “The Alternative Care Area allows patients with minor illnesses or injuries such as respiratory infections to be seen by an experienced provider so our patients can get back to enjoying their lives.” This also frees up our critical care space for patients with life-threatening injuries that require immediate assistance.

“If there is an open bed, a patient will be seen almost immediately,” says Tarascou.
A Powerful Partnership

To better meet the needs of community members, Madera Community Hospital partnered with CEP America in October 2003. All physicians with CEP are board-certified in emergency medicine, ensuring that patients get the best care possible.

“Partnering with CEP has allowed us to enhance the services we are able to provide at MCH,” says Rochelle Tarascou, RN, BSN, Emergency Service Director at MCH. “These physicians are locally based, living and working alongside members of Madera, and treating emergency room patients quickly and with compassion.”

Special Training for Better Outcomes

The ED is staffed with specially trained physicians and nurses who have years of experience handling emergency situations.

“MCH sees all types of emergencies, from diabetic emergencies and cardiac-related events to many other life-threatening problem and situations,” says Tarascou. All emergency team members are trained providers of advanced care in life support. “Being specially trained means we can offer the best care possible to people of all ages and from all walks of life,” says Tarascou. “Whether a patient is experiencing a life-threatening event or a minor illness, we are committed to meet the needs every day of the year, at any time of the day.

For more information on how Madera Community Hospital is striving to meet you and your family’s health needs, please visit maderahospital.org.

Don’t Delay

For scrapes and sore throats, you might be able to schedule an appointment with your primary care physician later in the week. However, there are situations when you should seek medical attention immediately.

Go to the Emergency Room or call 911 immediately if you experience:

- chest pain
- broken bones
- head trauma
- shortness of breath
- sudden-onset headache
- severe abdominal pain
- uncontrollable bleeding

However, if there is a wait, it is because another patient might be in need of life-saving measures at that moment.”

It is MCH’s goal to keep patients as informed as possible and to provide care to all patients in a timely manner.

“Partnering with CEP has allowed us to enhance the services we are able to provide at MCH,” says Rochelle Tarascou, RN, BSN, Emergency Service Director at MCH. “These physicians are locally based, living and working alongside members of Madera, and treating emergency room patients quickly and with compassion.”
The Best for Mother And Child

As the long-anticipated day of your baby’s birth approaches, you may feel excited, happy, worried, and fearful. Learning what to expect and preparing for the big event are important ways you can help yourself and your baby.

In Madera Community Hospital’s Labor and Delivery Department, experienced, attentive nurses expertly monitor and guide both mother and baby during the entire birthing process. We offer state-of-the-art quality care for expectant mothers and their babies. From childbirth education to a positive birthing experience, we are dedicated to providing families with a warm, relaxed atmosphere in which to experience one of life’s greatest moments.

Madera Community Hospital Maternal offers:

- prenatal education
- maternal child tour of services
- 4 labor, delivery, and recovery suites
- operating rooms immediately available for caesarean sections
- infant security system
- lactation consultant sessions and education for parents

The concept of family-centered care is advocated throughout the Mother-Baby Department.

The Labor and Delivery unit is designed to convey a home-like feel and features four nicely decorated, private labor, delivery, and recovery suites. Each Labor and Delivery Room is equipped with equipment for monitoring mother and baby and for delivery in the room. Most deliveries occur in the private suites, but the operating rooms are nearby should a need arise.

Our nurses support the family throughout the birth process from birth to discharge home. For most mothers, that means simple comfort measures, such as leisurely showers and walking with their families.

No matter what the birth experience, labor and delivery nurses are there to guide and assist Mom and the family.

Education is an important part of the labor and delivery experience as well. Madera Community Hospital offers extensive classes and parenting resources before and after delivery.

Parents can preview the hospital in the OB Tour and choose from classes in childbirth, breastfeeding, and infant care.

For more information about Labor and Delivery Services at Madera Community Hospital please call (559) 675-5555.
Baby Steps
A Comprehensive Prenatal Services Program

Madera Community Hospital offers a Comprehensive Prenatal Services Program (CPSP), which offers classes to fit your active life. You may start at any time during your pregnancy and come as often as you want. You don’t have to be a first-time mother, and you’ll receive free baby gifts with each class that you attend. Group classes are also available. You’ll have your own private health educator for individual sessions. All of the Baby Steps nurses are experienced in the Maternal/Child specialty areas. Some of the classes offered include:

- breastfeeding
- infant care
- infant CPR
- labor and delivery
- early pregnancy
- nutrition advice
- pre-term labor
- early pregnancy
- nutrition advice
- pre-term labor

Medicare, Medi-Cal, and some health insurance plans are accepted, in addition to a sliding fee schedule for the uninsured. For more information or to make an appointment, please call (559) 675-5530.

Sweet Success
Diabetes and Pregnancy Program

The Sweet Success Program is a California Diabetes and Pregnancy Program offered by Madera Community Hospital. Women with diabetes are special, and pregnancy is special for women with diabetes. Pre-pregnant and pregnant diabetic women can be helped to control their diabetes through:

- dietary adjustments
- exercise
- self-monitoring of blood glucose levels
- regular supervision by their physician

The services available through Sweet Success are:

- pre-pregnancy and pregnancy classes and counseling
- workshops for health care providers
- consultation services to physicians

If you are a diabetic woman and have a question about this information or other issues concerning diabetes, call now. Ideally, participation starts before pregnancy occurs.
Madera Community Hospital offers a wide range of same-day surgeries that allow patients to return to the comfort of their own homes mere hours after their procedures. Same-day surgery offers a wealth of benefits for patients, including less time spent away from loved ones, decreased risk for acquiring an infection, and the prospect of a more successful recovery in the familiarity of the home environment. Specialties that offer same-day surgery include:

- general surgery
- gynecology
- orthopedic surgery
- otolaryngology (ears, nose, throat)
- GI endoscopy

Simple and Streamlined

One the day of a patient’s surgery, he or she completes all the necessary paperwork in the Main Admissions area before being directed to the same-day waiting area. Next, a staff member of the Surgical Department will take the patient into the department and start an IV, while nursing staff provides information and education regarding their procedure. When the surgery is complete, the patient is taken to the Post Anesthesia Care Unit (PACU) for approximately one hour, followed by an appropriate time of monitoring in the Same-Day Surgery area before being released from the hospital.

“Our entire team is focused on making the surgical experience safe and efficient for patients,” says Tim Hieger, RN, CNOR, Director of the Surgical Services Department at MCH. “We want patients to be able to return home quickly so they can begin healing with the support of their loved ones.”

“The advancements seen in Laparoscopic Surgery over the past decade has been tremendous. Ten years ago, many surgeries, such as a hysterectomy, required patients to stay in the hospital multiple days afterward. Today, many patients can have their surgeries in the morning and go home the same afternoon.”

—Tim Hieger, RN, CNOR, Director of the Surgical Services Department, at Madera Community Hospital
Traditionally, health records were maintained using cumbersome, inconvenient paper files. Introducing a new electronic medical record (EMR), Madera Community Hospital has helped make medical care more efficient and effective.

Electronic medical records serve as a comprehensive source of clinical data about any given patient. From previous hospital visits to diagnostic information and allergies, EMR offers physicians an organized, detailed layout of a patient’s history and medical needs.

After going live in 2012, the EMR system at MCH has had a dramatic impact on both efficiency of care and patient safety. Within each patient record, safeguards ensure that medications are given in appropriate doses to prevent the possibility of drug interactions or allergies.

“From a physician and patient perspective, the true advantage of the EMR is the convenience factor,” say Shirley Baymiller, RN, Director of the Informatics Department at MCH. “Across the board, the availability of the EMR system allows physicians and staff to provide the highest level of patient care possible in a safely and timely manner.”
Since 1993, Family Health Services Clinic has been serving the healthcare needs of the Madera community. Our full-service clinic offers a wide range of medical services supported by a dedicated and caring staff.

As the medical needs of Madera County grew, Madera Community Hospital responded by expanding our rural health clinic services in Chowchilla. In 2008, the Chowchilla Medical Center Clinic was opened. Today, between both locations, we care for more than 45,000 patients a year.

Both clinics provide high-quality care and cost-effective services for the underserved populations, and both offer a full range of quality, primary health care services for members of our community, from prenatal to seniors. Our patients also have access to services provided by Madera Community Hospital’s Laboratory, Radiology Department, Respiratory Care, Emergency Department, Specialty Clinic, and many other services.

Medicare, Medi-Cal and some health insurance plans are accepted, in addition to a sliding fee schedule for the uninsured.
Locations

Chowchilla Medical Center is staffed with a full-time Physician and a Nurse Practitioner or Physician Assistant. We also have a Podiatrist and Internal Medicine, Eye, and OB/GYN physicians available by appointment.

285 Hospital Drive, Chowchilla, CA 93610
(559) 665-3768
Mon–Fri 8:00am–6:00pm, Sat 8:00am–12:00pm

The Family Health Services Clinic in Madera is staffed with Family Nurse Practitioners and Physician Assistants.

1210 East Almond Ave., Madera, CA 93637
(559) 675-5530
Daily 8:30am–8:000pm

Family Health Services also offers specialty clinics, in which local specialists rotate through the clinic on a regular basis. Specialty Clinics take patients upon referral and by appointment only.

Services

We offer the following services at both locations:

- child healthcare
- well child exams
- immunizations
- adult healthcare
- family planning services
- pap smears
- treatment of minor injuries & illnesses
- treatment of acute & chronic illnesses
- urgent care services
- minor surgical procedures
- preventative healthcare
- complete physicals
- employee physicals
- WIC physicals
- sports physicals
Laboratory Services

Madera Community Hospital Laboratory Services provides services through a modern clinical laboratory. The laboratory has a full complement of state-of-the-art analytical equipment and qualified personnel. Our experienced and highly skilled technical and support personnel includes Licensed Clinical Laboratory Scientists, Medical Laboratory Technicians, Certified Phlebotomists, customer service personnel, and administrative personnel.

We offer a full range of laboratory testing to Madera community residents and surrounding areas, including: Department of Transportation and Pre-employment Drug Screening and Breath Alcohols. Laboratory Services accredited by Healthcare Facilities Accreditation Program, State of California Department of Health, and CLIA.

Our Laboratory Services Team is committed to providing outstanding test quality and customer service.

Laboratory Services require an order from a physician. Patients must bring proper paperwork from their physician’s office prior to registering at Main Hospital Admitting to receive Laboratory Services.
Foundation
With a commitment to build strong relationships between Madera Community Hospital and the people served through philanthropic support, the Madera Community Hospital Foundation provides numerous opportunities for giving.

As cost pressures continue to grow, the Madera Community Hospital Foundation (MCHF) is committed to protecting quality community health care. The generosity of those who give to the MCHF makes a crucial difference in our ability to fulfill our mission to the community we serve.

The MCH Foundation was formed in 1978 as a fundraising arm of Madera Community Hospital. The Foundation Board is made up of 25 volunteer community members. All funds raised by this organization will be invested in Madera Community Hospital.

We seek support from interested donors in areas that need improvement, to support innovative programs and to acquire the latest technology. Donations, charitable contributions, and gifts help Madera Community Hospital to improve health services and enhance the quality of life of people in our communities.

Ways to Donate

You can make a difference! With your support, we can make sure that the finest health care services are available to you, your family, and other patients. By supporting MCHF, you will not only be enhancing health care in your local community but also make an important contribution to improving health and well-being in the California Central Valley. There are many ways to give to MCHF. Choose the one that is right for you:

- **Credit Card—Donate Online Now** Make a secure donation online with your credit or debit card.
- **Cash Gifts** Your tax-deductible gift supports crucial community health care programs and state-of-the-art medical technology.
- **Bequests** Leave a legacy with a gift from your will or living trust.
- **Life Insurance and IRA** The easiest way to leave a legacy—simply add MCHF as a beneficiary using a standard form.
- **Endowments and Named Funds** Permanently name a fund or endowment as a lasting legacy to a special person.
- **Memorial and Tribute Gifts** Make a gift in honor of your loved one, special doctor, or nurse.
- **Matching Gifts** Many employers match gifts made to not-for-profit organizations. These programs can double or even triple your gift. For more information, contact your Human Resources Department.
- **Foundation and Corporate Gifts** Our foundation and corporate partners help us invest in the future of healthcare.

Give a gift ... Save a life.

**Generosity Heals ... Make a gift today!**

**MCH FOUNDATION** 1250 E. Almond Ave., Madera, CA 93637 • (559) 675-5503
At Madera Community Hospital, we strive to give more than excellent health care; our goal is to provide hope, comfort, and convenience for our patients and families. Our volunteers play an important role in helping to provide these simple but exceptional services through their generosity.

MCH has 35 junior volunteers and 80 senior volunteers. They can be seen throughout the hospital supporting our patients and staff in many ways. Always seeking to provide exceptional care, they are assigned to different service areas and departments where they perform an array of duties dependent upon individual interest.

For more information on volunteering opportunities please call (559) 675-5503.

Opportunities include:

**Reception/Information Desk Services**

Individuals who have good communication skills might want to volunteer their time assisting visitors at the information desk by providing information, answering general questions, and directing visitors.

**Hospital-Related Services**

Volunteers welcome and escort guests, transfer patients via wheelchair, and deliver flowers, cards, and magazines to patient rooms.

**Hospital Courier Services**

Volunteers assist with delivery of confidential mail and other printed matter and packages to the offices of physicians.

**Gift Shop**

For those who love to shop, The Gift Shop would be the place to volunteer! The staff at The Gift Shop offers important services to the hospital’s patients, families, visitors, and employees. All profits from The Gift Shop’s sales are donated to the hospital.

**Hospital Greeter**

If you are friendly, outgoing, caring, and compassionate, this is the position for you. The hospital greeter welcomes everyone coming into the hospital and thanks them as they leave. They work closely with the reception desk and hospital-related positions, providing excellent customer service.

Your help will make a difference in someone’s life.
